Forgive me for this, but I'm going to be harsh here. Magic Potion Destroyer is essentially an idle clicker game. Whilst the lore is plenty interesting and makes you want to continue, that's essentially all there is to it. It's like if you took Magic Potion Explorer and made fifty levels or something of the same exact damned hundred floor slog. The only difference between the levels is what the starting bonuses/penalties are. And well, a few spoiler-y things but I won't get into that. I won't go so far as to say the game is

---

lazy, because it isn't. It does however get extremely repetitive extremely fast. All in all, if you like idle games you'll probably enjoy this, but if you're an RPG person steer clear. This is definitely not a \$10 game and perhaps not even \$5. Grab it if it's ever on sale for less than \$3.. Forgive me for this, but I'm going to be harsh here.
